

Environmental Policy Statement

Severn Waste Services are committed to providing an integrated waste management service to our customers whilst preventing pollution and continually improving our environmental performance through:

- ◆ Operating an environmental management system to BS EN ISO 14001 standards and continually improving the effectiveness of this system.
- ◆ Establishment of annual objectives and targets and conducting regular reviews of our performance.
- ◆ Complying with all applicable legal requirements and other requirements to which the organisation subscribes which relate to its environmental aspects.
- ◆ Assessing and minimising environmental aspects and impacts from our operations including the implications of new projects.
- ◆ Identifying the potential for emergency situations and developing plans to prevent and mitigate their environmental impacts.
- ◆ Planning and carrying out our activities related to waste handling, transport and maintenance under controlled conditions.
- ◆ Ensuring our employees and contractors have sufficient experience and training to meet their environmental responsibilities and contribute towards the achievement of our environmental policy.
- ◆ Working in partnership with our stakeholders to help meet challenging targets to reduce, re-use, recycle and recover value and energy from domestic waste and avoid valuable resources going to landfill.

The ultimate responsibility for environmental management lies with the Board of Directors and through them the Executive Committee. Specific arrangements and organisational responsibilities are detailed in the Management System. The Executive Committee will review this Environmental Policy on a regular basis to ensure it continues to meet both the company and our customer's needs.
